

# The compass

- Never - Eat - Smelly - Worms -

## About the compass

1. A compass gives you direction.

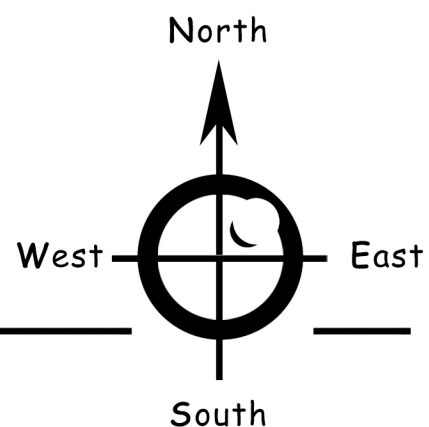

2. It has 4 poles. North, East, South, West.

3. A magnetic compass  shows the earth's  north.

4. The compass is about 1000 years old!

5. How does it work?

The needle is magnetic and always points north.
